Demolition Disclosure Form

Project Address:

Effective January 1, 1991 Assembly Bill 2791 required applicants for demolition permits to comply with certain Environmental Protection Agency (EPA) and South Coast Air Quality Management District (SCAQMD) regulations concerning asbestos containing materials. **(This also includes re-roof tear off's when asbestos containing materials are involved).**

The following questions must be answered before your application for a demolition permit can be processed.

Have you complied with the requirements of the South Coast Air Quality Management District under Rule 1403? This rule requires that you notify the SCAQMD 10 days before you begin the demolition project.

For more information visit: www.aqmd.gov

YES

NO

Is the structure asbestos free? (If you are uncertain, you should contact an asbestos consultant to investigate the structure before answering this question).
